Nickel plating of FJVR* 3/8" valves

It has been decided to change the passivated brass surface of the FJVR 3/8" valves to a nickel plated surface in line with the 1/2" FJVR valves and Danfoss radiator valves.

Code no's 003L1009 and 003L1010

Delivery

The nickel plated valves are delivered from CDC in about one month from now.
Consequently any 2004 price list should be updated accordingly.

* FJVR is a return temperature limiter for controlling the flow in radiators and small floor heating systems. It may also be used to ensure a minimum flow in heating pipes.
