The Pots Company

Our values

Architectural design

We do not work with product designers, we have architects responsible for the design of our pots. This means our pots are conceived in a completely other way. Architectural design means smart, well thought out, sleek and a combination of form and function. Aesthetics is key. Our pots will always have to be stunning in every way possible.

Timeless

We develop ranges which are not bound by trends. We want our products to be pretty and relevant not only today, but also tomorrow and in ten years' time. This has some significant advantages: Consumers will always be able to buy matching pots to the ones they already have, making repeat sales more likely. Because our ranges are timeless, resellers won't be stuck with unsellable stock. What isn't sold this year can still be sold the next without the need for a sale.

Durable

Durability is at our core. We not only want our products to withstand trends design-wise, we also want them to stand the test of time. Because of this we develop our products with the highest quality and in the case of Ecopots, also with the use of a durable base material like recycled plastics. We want all our pots to be breakproof, frost resistant and UV resistant while still being lightweight and stunning. Basically, we want our products to look good and stay good for at least 10 years.

Innovative

Another result of our architectural design approach is innovation. We want to add new, smart things to the world of pottery like invisible suspension systems, integrated drainage systems and new use of materials.

Carefree

Products from The Pots Company are carefree. With easy unboxing, stacking and practical use. We stand for our products. This means all our products come with a 10 year warranty on breakage and production faults. And when there is an issue, with resellers or consumers, it is our challenge to resolve this quick, smooth and to every ones satisfaction. Carefree in every possible way.

Conceptual (shop) presentations

Buying decisions regarding pottery are often made in the shop itself, so it is key to grasp consumers attention in order to tell and sell your story. This is why The Pots Company puts a lot of effort in creating stunning POS material for our brands to bring forth the strong- points and story of the respective brand.

Brand promise

'Durability by design'

An innovative vision for the future

Our world is constantly changing. Both our economies and our products are becoming increasingly sustainable. That being said, sustainability is so much more than just the responsible use of raw materials. We believe in developing products that are sustainable both in terms of durability and style. They should withstand damage and wear and tear, whilst remaining relevant and aesthetically pleasing for their users. Not only today, but also tomorrow and even in ten years' time. After all, to us, the most sustainable products are those you can enjoy year after year, without the need to replace them.

Our mission to realize a durable design

Ecopots gives 'sustainability' a whole new meaning. We design, produce and sell pots made with recycled plastic and ensure they are sturdy, beautiful and stylish, not only today, but also tomorrow and even in ten years' time.

Our product

Guaranteed composition

Many times copied, never matched

Some markets are being flushed with plastic plant pots, some bearing remarkable resemblance to our pots. Offered at a much lower price point they may raise the question as to why not sell those instead. We only want to sell high quality pots that make people happy and make them come back wanting more. This is why we have teamed up with CENTEXBEL, a university plastics laboratory, for the development of truly durable plastics and have asked Bureau Veritas to test our products.

- FFU (freeze test, colourfastness test and leakage test)
- Polycyclic Aromatic Hydrocarbons (PAHs) Content
- Candidate List of Substances of Very High Concern for authorization published by European Chemicals Agency (ECHA) Regarding Regulation (EC) No. 1907/2006
- REACH
- Social audits (BSCI / SEDEX)
- **QA-CER by the Belgian Quality Association (BQA)**
- **Forest Management Certification (FSC)**

A unique formula with high quality recycled plastics

All Ecopots are made from a unique formula containing 80% high quality, first use, recycled plastics of which 50% PP and 50% PE (the highest percentage in market today), and 20% residual waste from natural resources to improve durability, UV resistance and insulation.

80%

high quality recycled plastics

Our product

Why we stand out

Design

- All Ecopots feature a unique, distinctive handfinished texture to give it the most natural look.
- Designed by architects.
- Ecopots models are timeless. Basic shapes with attention to their proportions.
- Ecopots are available in 6 different colors.
- Lifetime up to 10 years

Function

- Ecopots are light and easy to move.
- Easy to re-pot because there is no inner rim.
- Insulating feature: the unique composition and thickness of our material helps to regulate temperature and humidity inside the pot during hot and cold weather.
- Always provided with an 'in and out' plug for in- and outdoor use.

elegant Ecopots rim for aesthetic purpose, but also makes it easy to repot

strong and frost resistant

made from high quality recycled plastics and natural stone particles

when the plug is removed water can flow away underneath the pot

Clever water reservoir

Giving your plant too much water is impossible with this system. The roots can never be soaked in water. On the other hand, when the plant needs water, the soil can suck water out of the reservoir. Handy.

Maximum usability

Loving the taste of fresh herbs but lack the space to make a little herb garden? With this Berlin grow table we just may have the solution for you! It fits on almost every balcony giving you the opportunity to grow and enjoy your own fresh herbs.

Integrated wheels

If you want to change the location of your heavy pot once and a while but you don't like the view of having wheels under your pot, then this is the perfect solution. The wheels are hidden underneath the bottom of the pot or sauce

Easy cleaning and repair

Heavy scratches or stains on your pot? With the Ecopots cleaning and repair set your pot will look as good as new.

Blind hanging systems

Our blind hanging systems are a perfect example of how we integrate form, function and usability in our designs. All of our wall-mounted pots include a separate wall piece that makes it easy to install and repot, while still looking stunning.

Innovative systems

Thinking different is in our DNA

Ecopots is a brand that is continuously looking for solutions to make pots and planters better looking and more practical.

ECOPOTS

COLLECTION 2021

Amsterdam

The most straightforward shaped flowerpot you can imagine. However Ecopots uses proportions that makes the shape even more attractive.

Manhattan Wall template

All of our Manhattan wall products include an installation template which can be very useful when installing a vertical garden. The template has various readymade patterns to choose from, simply place the sheet of paper against your wall and drill out the corresponding holes.

Sofia Wall

The Ecopots Hanging Sofia is based on our Sofia flower pot to which we added our unique suspension system. The result is a beautiful blind hanging flower pot with which you can turn your wall into a stunning and vibrant herb or flower garden.

Saucers

Want to use your Ecopots outdoors? We always advice to use a saucer with your pot. Our Ecopots pots and planters come with a rubber plug in the bottom which you can remove for outside use. Use the saucer and don't forget to remove that rubber plug.

Sustee Stick

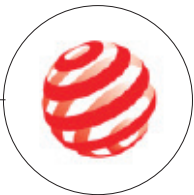

Incorrect watering is reported to be the cause of plant wilting, 80% of the time. Sustee is a 'watering checker' that can tell you when to water your plant. Just stick the fail-proof device in your pot and you'll be at ease with this indicator for at least 6 months.

ECOPOTS and its POS MATERIAL

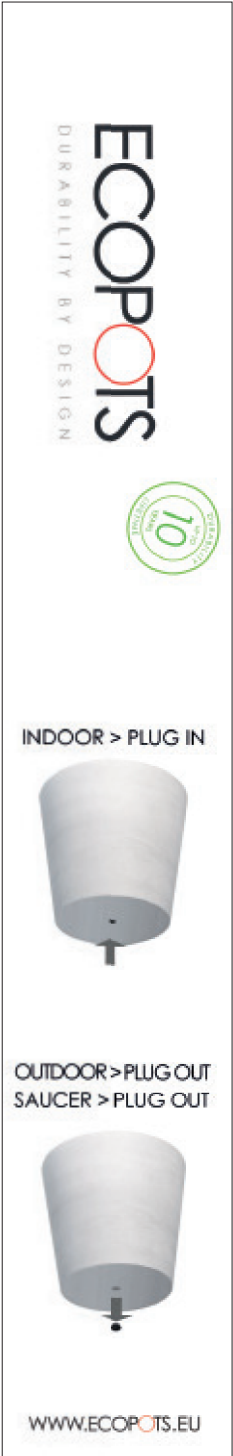

The philosophy of ECOPOTS focuses on durability. Its recycled plastic is strong and lasts long. It's only logical that we extend that long term thinking in the quality of our Point of Sales Materials. While other brands focus on providing cheap throw-away POS material, ECOPOTS wants to offer a better, long life quality for a reasonable price. This way the POS concepts of ECOPOTS keep their nice looks and attraction on the shopfloor for a long time which is crucial for the selling out of the products... POS materials pays off!
