Regulation (EU) 2016/425 Module B, EU type-examination

Issue 3

PPE Product

DuPont® Tyvek® 200 EasySafe model CHF5 hooded coverall, constructed using a white spunbond polyethylene fabric with the external seams sewn with either white or yellow thread, front zip closure with storm flap and elasticated at the hood, cuffs, ankles & waist. This coverall is available in six nominal sizes.

It is certified that the manufacturer's technical file and the above mentioned PPE have been assessed and found to meet the applicable Essential Health and Safety Requirements in Annex II of Regulation (EU) 2016/425 Personal Protective Equipment

The following have been applied:

EN ISO 13982-1:2004 + A1:2010 (Type 5: Limited life, full body protection against airborne solid particulates);

EN 13034:2005 + A1:2009 (Type 6: Limited life, full body chemical protective clothing offering limited protection against liquid chemicals);

EN 1149-5:2008 (Protective clothing - Electrostatic properties) for electrostatic dissipative protective clothing with a surface resistance of $\leq 2.5 \times 10^9 \Omega$ on both surfaces of the garment.

In addition, with two exceptions the PPE satisfied the requirements of

EN 1073-2:2002 (Non-ventilated protective clothing against particulate radioactive contamination) with a performance classification of TIL Class 1.

The exceptions being that clause 4.2 specifies that the minimum puncture resistance should be level 2, but the fabric used has a puncture resistance classification of level 1. It also requires resistance to ignition, which has not been tested.

This certificate is issued on the strict condition that appropriate checks on manufactured PPE, as detailed in Article 19 (c) of the Regulation are implemented and maintained while the model is in production

Certification is based on technical file reference: Tyvek 200 EasySafe, model CHF5, July 2018

SGS Reference Number UK/CRS 237389.

This certificate remains the property of SGS Fimko Oy to whom it must be returned on request.
