

REPORTING FORM TO USE IN LEED CERTIFICATION

Manufacturer: PAVIGRÉS CERÂMICAS, SA

Manufacturer location (city, country): Anadia, Portugal

Product: Salema GGKV29N

Group: Bla

ENVIRONMENTAL INFORMATION /ENVIRONMENTAL VALUE:

% Post-consumer Recycled content: 0% (see Note a))

% Post-industrial Recycled content: 18,0 % total (contains in it's composition 18,0% of solid recycled materials)

Note a) although we don't add any post-consumer recycled content to our product, we have environmental concerns, and over 99% of the residues we produced in 2022 were sent to valorization - 99.5% to valorization and only 0.5% to elimination.

Environmental Product Declaration Type: Yes

ISO 14001 Environmental Certification: YES

Green Label: None

VOC Content (g/l)⁽¹⁾ : N.A.

(1) - VOC Content and Quantity is usually required only for wet-applied interior finish products (adhesives, sealants, paints and coatings)

EMISSION VALUE (VOC)⁽²⁾: Classified A+

(2) - No COV test has been done, because ceramic tiles are completely inorganic products processed and fired at temperatures over 1000 °C, and for their nature ceramic tiles with no surface applications post-firing do not emit any organic compounds

"Ceramics are considered to be inherently nonemitting sources of VOCs, thus they are considered fully compliant without any VOC emissions if they do not include integral organic-based surface coatings, binders or sealants"

Inherently Nonemitting Material: YES
