Painting Cardboard, Protective Cardboard and floor Cardboard

Cardboard is a completely untreated natural product that is used as an underlay and separating layer in floor constructions. Our cardboard consists of recycled textile and cellulose fiber and here fiber from wool, cotton, cardboard, newsprint. This product is for indoor use. Name in use for this product can be Painting Cardboard, Protective Cardboard and Floor Cardboard. The product is used as a temporary protection on floor during construction or as an underlay under the floor as a reduction of impact sound and with good heat transference from a floor heating system.

1 DATA

Article:	UP15	UP30
Impact Sound Improvement:	$\Delta L_w = 19$ dB (EN-ISO 140-8)	$\Delta L_w = 19$ dB (EN-ISO 140-8)
Thermal Insulation:	With 15 mm Parquet = 0,154 m ² K/W	With 15 mm Parquet = 0,154 m ² K/W
Length:	15m	30m
Width:	1m	1m
Weight:	6kg	12kg
Thickness:	0,87mm	0,87mm
Dedicated Substance	400gsm*	400gsm*
Packaging:	48 rle/pallet	24 rle/pallet
Type of packaging:	Rolls are placed in vertical, whole pallet is stretched	Rolls are placed in vertical, whole pallet is stretched
Pallet's type	One way pallet 1200 X 800	One way pallet 1200 X 800

*Possible substance tolerance +/-7% (based on DIN 52117 norm)

2 RECYCLED MATERIAL

Material	Percentage (%)	Percentage (%)	Percentage (%)	Comments
	<i>Recycled material of the total product's weight</i>	<i>of the recycled material that has not reached the consumer level, such as production waste, etc. (pre-consumer)</i>	<i>of the recycled material that has reached the consumer level (post-consumer)</i>	
fabrics	20	0	100	
wastepaper	80	0	100	

3 STORAGE REQUIREMENTS

It should be stored in dry space, away from moisture.

4 NANO-MATERIAL

The product does not contain any nanomaterial.

5 WASTE MANAGEMENT

When the supplied product becomes waste, it is not classified as hazardous waste.

6 VOLATILE ORGANIC COMPOUNDS (VOC)

Emissions data for volatile organic compounds are not relevant to the product. The product contains only cardboard pulp made from paper and textile waste not causing VOC emissions.

7 SUBSTANCES OF VERY HIGH CONCERN (SVOC)

In the production process we do not use substances on the candidate list, ED list and SIN list. However, the raw material used for production comes from recycling and trace contamination with substances appearing on these lists cannot be 100% excluded. The concentration of impurities should not exceed 0,1%.
