

PHILIPS

Twirly CL254

5

Diagram 5 illustrates the connection of the power cable to the terminal block. The power cable, which has a black outer jacket and a white inner insulation, is shown being inserted into the terminal block. The terminal block has three terminals, each with a screw. The power cable is connected to the terminal on the left. The diagram includes three circular callouts: the first shows a 9mm dimension for the terminal block; the second shows a 1.5mm dimension for the terminal block; the third shows a screwdriver being used to tighten the screw on the terminal block.
